USE-CASE FLOW — FIND & BOOK COUNSELING SESSION

Corporate Mental Wellness & Counseling Platform

Use Case ID:	UC-03
Primary Actor:	Corporate Employee
Supporting Actors:	Licensed Therapist; Notification Service
Goal:	Book an available counseling session with a licensed therapist.
Preconditions:	Employee is registered/logged in; therapist schedules are available.
Postconditions:	Appointment is recorded and confirmation is sent to the employee.

Main Success Scenario

1. Employee opens the counseling booking function.
2. System displays available licensed therapists and appointment slots.
3. Employee selects a therapist, date, time, and session mode.
4. System validates that the selected slot is still available.
5. System creates a provisional appointment and requests confirmation.
6. Employee confirms the booking.
7. System records the appointment and updates therapist availability.
8. System sends confirmation and displays the booking details.
9. Use case ends successfully.

Alternate Flow — Selected Slot Becomes Unavailable

- 3a. The selected slot has just been booked by another user.
- 3a1. System informs the employee that the slot is no longer available.
- 3a2. System refreshes and displays the latest available slots.
- 3a3. Employee selects another slot and the flow resumes at Step 4.

Alternate Flow — Notification Delivery Failure

- 8a. Appointment is stored, but the notification service is unavailable.
- 8a1. System displays the booking details in the employee portal.
- 8a2. System marks the notification for retry and keeps the appointment active.

Lab 1 requires a step-by-step main success scenario and at least one alternate flow for a key use case.
