Corporate Mental Wellness & Counseling Platform — UML Component Diagram (Microservices)

Legend

- Provided interface (ball): service the component offers
- Required interface (socket): service the component needs
- Assembly connector: socket plugged into ball

Labels: interface name and protocol / technology

E1–E5: Lab 2 epics · A-04, A-05: Lab 1 actors

Booking flow (UC-03): Employee Portal → IEmployeeAPI → API Gateway → IPseudonym (verify) → IBooking → Booking → INotify (confirmation sent asynchronously)

Privacy rule (FR-001, FR-003, FR-006): only the Anonymous Identity service handles pseudo-ID tokens; the other services store pseudo-IDs only, never names, emails or employee IDs. Wellness Analytics receives aggregates for groups of 10 or more, so HR cannot single out an employee (FR-004, FR-005).
